

9. Site 009. Land to east of Lock Road

Area: 2.8 has. Capacity: 80 dwellings

Vehicular access. Lock Road is unsuitable due to width and bends to provide access to this site. No other public road abuts the site.

Incapable of development

Public comment

Conservation area. Narrow lane.

Access problem.

Totally unsuitable.

Preference site (with other sites)

6,7,8,9,12 are obvious choices, if affordable housing is required, due to the ease of access to village amenities.

Looks like a dangerous point for access to come out onto narrow bendy lane, already used by school traffic.
