

10. Site 010. Land South of A4103 & Orchard View

Area: Small. Capacity: approx. 5 dwellings

Vehicular access. Access may be possible from the old road to the west side of the site.

Pedestrian access. The same as for the vehicular access. The site lies to the south of the A4103 and walking to the main village is not advisable due to the width of the road and the number of vehicular movements.

Physical characteristics. This is a small site left over after the road was re-aligned.

Area. Clearly not large enough to meet the requirement for 30 dwellings but could provide one of several small sites to meet that requirement.

Public comments

Not well thought out. Road too busy all danger to children.

Does not have an access problem, and appears to have potential for housing development.

On wrong side of A4103.

Not feasible, too close to main road.

Not sensible to be other side of Worcester road.
